Important Information

Treatments are provided and charged on a sessional basis. Treatment prices are based upon the duration of treatment, the capital and servicing costs of the equipment utilised and the consumables required. All prices are inclusive of VAT where appropriate.

Payment in full is required at the end of each treatment session. Payments can be made by Credit Card (Mastercard/Visa), Debit Card (Switch/Delta) or Cash.

Appointments that are missed or cancelled with less than 24 hours notice will incur a charge of £50 per half hour treatment session. We reserve the right to charge a non-refundable deposit of £50 at the time of making a booking.

An initial consultation is required for all treatments. There is no charge and no obligation to undertake any treatment. The initial consultation provides an opportunity to:

- Assess a client's suitability for treatment
- Explain treatment options and likely outcomes
- Discuss any possible side effects of the treatment
- Provide an indication of the likely number of treatment sessions and consequential cost
- Answer any questions the client may have

Client satisfaction is very important to our business. Clinical staff will not advise undertaking any treatment if they consider that the desired results are unlikely to be achieved.

Most treatments will require a number of treatment sessions. At the time of your initial consultation your nurse will provide an indication of the likely number of sessions required to achieve the results you discuss. As individual people respond differently to the treatment this can only be a guide to average treatment requirements.

If you wish to pay for the planned course of treatments in full, at the time of your first treatment, you will receive a 10% discount off the total price.
